

Frederick Lietzman

Chairman & CEO | Emmy Award-Winning Designer | Board-Certified Podorthist | Principal Inventor, US Patent 11,806,881 B1

VALUE PROPOSITION

Agentic Insight provides industry-agnostic Program Authority for AI integrations — serving as Owner's Representative, not builder. We prevent the structural failures that occur when AI systems are deployed without independent governance, accountability, and IP protection.

With 40+ years of cross-industry pattern recognition, Frederick Lietzman identifies integration exposure before it becomes operational failure. **The value is what does not go wrong.**

ENGAGEMENT TIERS

OBSERVER	MILESTONE ALIGNMENT PROCESS	PROGRAM AUTHORITY RETAINER
\$15,000 Fixed Fee	\$50,000 Fixed Fee	\$65,000 / Month
Integration Exposure Assessment. Executive diagnostic producing Integration Exposure Score, vendor seam accountability map, IP ownership analysis, and platform dependency evaluation. Observer investment credited toward MAP if engaged within 60 days.	4-week governance architecture engagement. Establishes Definition of Done, accountability structure, IP protection protocols, and readiness gates. Prepares organization for sustained Program Authority.	Ongoing governance of vendor coordination, behavior stability, risk management, and operational readiness. Independent oversight protecting client-owned AI investment at scale.

CORE CAPABILITIES

Integration Governance	Vendor seam accountability, Definition of Done, behavioral stability standards, and update risk protocols across multi-vendor AI deployments.
IP Ownership Protection	Identification of intellectual property exposure in AI-generated outputs, training data, model behavior, and platform dependency chains.
Program Authority	Independent oversight ensuring vendor commitments are enforceable, deliverables are testable, and operational readiness is verified before go-live.
Integration Exposure Scoring	Proprietary diagnostic framework quantifying organizational exposure across governance, IP, platform dependency, and vendor accountability dimensions.
AI Operational Readiness	Assessment of AI system stability, rollback capability, monitoring infrastructure, and incident response readiness prior to production deployment.

WHY AGENTIC INSIGHT

- Industry-agnostic: same governance framework applies regardless of AI vendor, platform, or vertical.
- Independent: no implementation revenue, no vendor relationships — accountability without conflict of interest.
- 40+ years of cross-industry pattern recognition including healthcare, manufacturing, retail, and professional services.
- Procurement-ready: SOW templates and supporting documentation available upon request.
- Emmy Award-winning design discipline applied to AI governance architecture and operational clarity.
